

In the Specification

Sequence Listing pages 27-29 have replaced Sequence Listing pages 1/2-2/2.

In the Claims

Claim pages 27-30 have been renumbered as pages 30-33.

In the Abstract

Abstract page has been renumbered as page 34.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was plotted against the number of trials for each condition. The number of correct responses increased with the number of trials for all conditions. The number of correct responses was highest for the condition with the highest number of trials (10 trials) and lowest for the condition with the lowest number of trials (2 trials).
